

LADx TechTalks – April 14th, 5pm

Marie-Jean Thoraval
(LadHyX, École Polytechnique)

What Zotero can do for your research

I will offer a 20 minutes talk on what Zotero can do for your research, including a few demonstrations, one click import of publications from the browser, some examples of its powerful plugins environment, and the easy integration of the BibCNRS access to publications:

”Zotero is a free, easy-to-use tool to help you collect, organize, annotate, cite, and share research.”

”Available for Mac, Windows, Linux, iOS, and Android”

Note that École Polytechnique provides unlimited cloud storage for all its members with a @polytechnique.edu email address. The software is free and open source (as it has been for more than 20 years already). All users can save an unlimited number of references and files to their local Zotero library. The unlimited storage provided by École Polytechnique is for the Zotero cloud storage, so that you can sync your whole library between devices and share group libraries with collaborators
